

# Protos-32<sup>®</sup>

Protos-32<sup>®</sup> mobilizes salts out of the root zone and improves soil productivity. Reducing soil salinity boosts soil health by increasing infiltration and water holding capacity.

- If you are dealing with sodic or salty soils
- If your soluble salts exceeds 3.0 on your soil tests
- If your chloride is higher than 200 lbs. per acre
- If your sodium is in excess of 150 ppm per acre
- If your sulfur is greater than 100 lbs. per acre
- If your nitrates are in excess of 35 lbs. in top 6"
- If your pH is in excess of 7.7
- If your calcium base saturation is less than 60%

THE SOLUTION: Protos-32<sup>®</sup>!

**Soil health is vital to your return on investments!** Recovery of those less than productive acres is important to maximize your return on all your input costs. Protos-32<sup>®</sup> was specifically designed to assist producers in recovering those acres, while increasing your operation's ROI.
